Community by Design
A NETCHE Production
30 minutes, 2002
Political Science, Sociology

Community by Design examines the social and political consequences arising from how we have designed our neighborhoods and cities. The program explores the design process through examples of actual neighborhoods, interviews with residents, and interviews with local, state and national planners and scholars.

Combining theories and empirical findings from political science and sociology with critical assessments of modern community planning, Dr. Lyn Kathlene proposes that certain neighborhood features strengthen civic engagement and political behavior.

Community by Design was produced for NETCHE by Nebraska Educational Telecommunications.

Lyn Kathlene, Ph.D., University of Nebraska-Lincoln, served as content consultant for the NETCHE-produced video Community by Design.
